DETAILED ACTION

1. Claims 1 to 18 are presented for examination. Acknowledgement is made of the preliminary amendment filed 6-27-2006.

Information Disclosure Statement

2. The references listed in the information disclosure statement submitted on 6-27-2006 have been considered by the examiner (see attached PTO-1449).

Allowable Subject Matter

3. Claims 1 to 18 are allowed.
4. The following is an examiner's statement of reasons for allowance: the primary reason for the allowance of the claims is the inclusion of the limitation of "a soft output of the decoder being arranged as an index to the plurality of look-up tables for retrieving a bit error rate contribution to the bit error rate of a received bit sequence." The prior art made of record teaches numerous methodologies for estimating the bit error rate in a communication system. For instance, Yellin (USP 7243295) teaches low complexity channel decoders wherein the step of decoding received encoded data uses look-up tables that stores soft outputs. Kumar (USP 7046694) discloses an In-band on-channel digital broadcasting method and system wherein the receiver estimates the codeword bits that corresponds to either upper or lower sideband signals.

However, the prior art made of record, taken alone or in combination fails to teach or fairly suggest or render obvious the novel element of the instant invention.

Specifically, the prior art made of record, fails to teach or fairly suggest or render obvious the novel element of "indexing the selected look-up table for obtaining a bit-wise bit error rate of the received bit sequence, by the soft-output of the decoder."

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
